

CARRASCAL, L.M.; DÍAZ, M. 1998. Utilidad científica y difusión internacional de Ardeola: un análisis bibliométrico - *Scientific utility and international diffusion of Ardeola: a bibliometric analysis. Ardeola 45:221-239.*

We analyse the pattern of citation of the papers published by *Ardeola* between 1983 and 1996 according to the authors who cited them, to the research topics these papers dealt with, and to the use of the scientific literature by their authors. Our main objective was to evaluate to what extent the goal of enlarging the international diffusion and scientific utility of *Ardeola*, which has directed the editorial line of the journal for the last two decades, has been reached. Also, we tried to detect the main factors which could have delayed reaching that goal, as well as to derive efficient ways to overcome them.
